

# Claude Sonnet 4.6 Leads Code Review — But at What Cost?

Eight LLMs benchmarked across three complexity tiers. Claude Sonnet 4.6 achieves the highest review scores at high complexity — yet surfaces **27 pylint issues**, nearly 3× more than any competitor. GPT-5-mini delivers the strongest balance of quality and clean code.

## Pylint Issues by Complexity Tier

27

Claude Issues (High)

Most pylint issues at high complexity

7

GPT-5-Mini Score

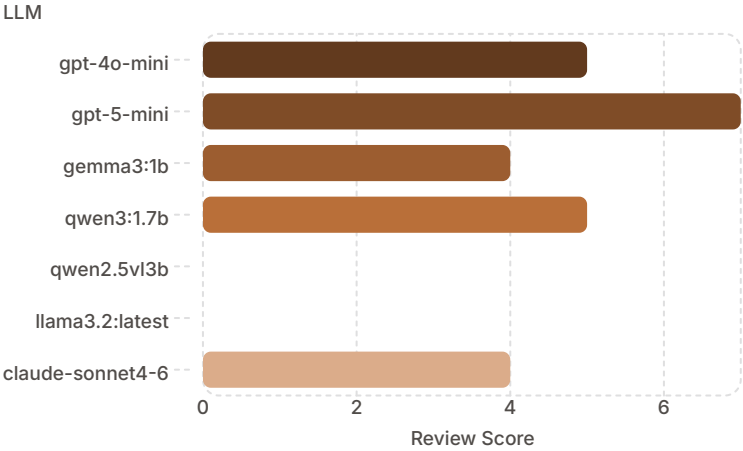

Top review score at high complexity

3

LLMs Failed

qwen3, qwen2.5vl, llama3.2 failed high-complexity tasks

## Review Score at High Complexity

**Key Takeaway:** Claude Sonnet 4.6 leads in code review depth but generates significantly more lint issues. GPT-5-mini offers the best quality-to-cleanliness ratio for production use.
